 - Bachelor's Degree in Computer Engineering

Expertise

React js
Node.js
Web Hosting
MongoDB
FastAPI
Model Deployment
Git/Github

Summary

Final year Computer Engineering student with experience in frontend development using React and backend development with Python FastAPI. Skilled in various programming languages such as HTML5, CSS, JavaScript, Python, C, and C++. Looking to apply my technical abilities and contribute in a professional setting.

Projects

Heritage Detector

- Made using React, Material and UI FastAPI, this application detects heritage site within Kathmandu Durbar Square using YOLO V8.

Signature Verification

- Compares similarity of two signatures using Neural Networks.
